Black Lumber Fines

Description & Process:

Feed Stock: Clean unpainted, untreated dimensional lumber

Particle Size: Material is ground to 1"

Color: Product is colored using Amerimulch water based colorant, Ultra Triple Black. Colorant is safe for humans and animals.

Texture: coarse and finely graded

Additional information:

Black Lumber Fines are Vision Recycling's 1" minus mini wood chips. It adds a consistent texture to planted areas and provides a solid black backdrop for plants. Use this product like a mulch to conserve water and suppress weeds. The chips are generally smaller than 1" and are colored using an environmentally safe water based dye. This material has been used in Xeriscape applications or drought tolerant landscapes which show off the desert-like environment and make the plants "pop" within the flower bed.
