Golden Blend

Description & Process:

Feed Stock: Clean, unpainted, untreated dimensional lumber

Particle Size: Material is ground to 4" minus with fines

Color: Light tan, blond recycled chip

Texture: coarse, chunky

This product is mostly made from pallets and clean lumber

Additional information:

Golden Blend is a natural ground cover that will reduce erosion and water loss. One cubic yard of Golden Blend weighs approximately 600lbs. Golden Blend is a larger wood chip made from recycled lumber. It can be used for pathways, sitting areas and planted landscapes. Not certified for use in playgrounds. Nails and metal are removed via a two-step magnet process. Keep weeds down, maintain soil moisture and provide a walking surface with this light colored product. The wood chips are generally between 4" and 3/8" in size.

Note: this material is NOT 100% free from deleterious materials including metal or debris.
