Soil Amendment

Description & Process:

Feed Stock: Organic green materials, yard trimmings, brush, leaves.

Particle Size: Material is ground to 2" and screened at 3/8"

Color: Dark mottled brown

Texture: Fine textured organic matter

Lab Reports: Vision Recycling has laboratory analyses available upon request

Additional information:

Vision Recycling's Soil Amendment is pre-composted material which can be applied as a top dressing that will break down slowly and provide certain nutrients while also acting as a fine mulch. The product can also be tilled into soil to increase soil organic matter and loosen heavy clay soils. This Soil Amendment will provide phosphorus, and potassium among other nutrients, as well as increase the organic matter content of the soil, though it is not a significant source nitrogen. If used as a top dressing Soil Amendment is a low-cost ground cover that adds organic matter to the soil while at the same time providing the benefits of a mulch.
