Description & Process:

- Wood-fines are the screened bi-product of Wonder Mulch, made from large brush
- Feedstock is clean yard trimmings including branches, tree rounds and self-haul drop off. No animal wastes or sludge waste are added.
- The ground up yard trimmings are then screened to a 1" inch size with a fine texture
- Wood Fines are a great top dressing mulch that look great on a landscape
- Or these can be used as a bulking agent for back yard composting bins. Add Vision's Wood Fines to your compost pile or applied like a normal mulch and top dressing in the landscape.

Benefits:

- Water Retention: Reduces evaporation
- Provides organic matter into the soils
- Protects the bare soil from wind and rain
- Provides an aesthetic appearance
- Enhances the beauty in a landscape
- Breaks down easily over time
