Components Blend:

- Feedstock includes the following:
 - 60 % healthy soil and 40% Vision Recycling Compost
 - The result gives a clean and healthy-looking soil
 - This product is a "Local" based sourcing material that is close to the facility in which it was produced

Additional information:

This product is a soil blend that varies from region to region and suitable for direct planting in any garden application. This provides a balanced blend of macro-and micro-nutrients for healthy root growth and abundant development of foliage, flowers, and crops. Great for topsoil replacement, direct seeding, lawn care, soil repair, raised garden beds, nursery stock, houseplants and flowers.

Vision Recycling's ground cover products are made from recycled, unpainted clean wood, yard trimmings & lumber. As this is a repurposed material we strive to have the best quality products on the market. Please note: Vision Recycling cannot guarantee 100% clean material. However, we continue to keep our standards high to provide the best quality material for your needs.
