Midnight Mulch

Description & Process:

Feed Stock: Organic green materials, yard trimmings, brush, leaves. No manures, no residential curbside pick-up, or biosolids are used.

Particle Size: After composting material has been cured and ready for sale it is between ½” and 1 1/2”

Color: Black to dark brown

Texture: Bulky organic matter

Regulations: Meets PFRP, temperatures reach over 130 F for 15 days

Additional information:

- One cubic yard weighs approximately 700lbs
- Composted mulch is the larger screened overs material of compost
- Can be used as a **non-floating** mulch in Bio Retention swales
- No presence of weed seeds or pathogens due to thermal composting process

Vision Recycling's ground cover products are made from recycled, unpainted clean wood, yard trimmings & lumber. As this is a repurposed material we strive to have the best quality products on the market. Please note: Vision Recycling cannot guarantee 100% clean material. However, we continue to keep our standards high to provide the best quality material for your needs.
